Linkedin | GitHub: Dekkuhere

SUMMARY

Results-driven Final-Year Computer Science Student / Full-Stack Developer with a strong foundation in building scalable web applications, interactive platforms, and modern tools. Adept at turning complex problem statements into elegant, user-focused solutions using modern frameworks. Passionate about clean code, minimalist UI/UX design, and continuous learning.

TECHNICAL SKILLS

- **Languages:** HTML, CSS, JavaScript
- **Frameworks & Libraries:** React, Node.js, Vite
- **Tools:** Git, GitHub, VS Code, Vite
- **Others:** Responsive design

PROJECTS SHOWCASE

GUIDLY (Mentora AI) | React, Node.js

Live Demo / Code Repository: github.com/Dekkuhere/guidly

- Designed and developed a problem-first student guidance platform matching peers with verified mentors for academic and career growth.
- Implemented a responsive, minimalist bento-grid user interface with dark-mode styling, glassmorphism elements, and optimized state management.
- Collaborated with the backend team and integrated frontend components with existing APIs.

Pixit | Kotlin, AndroidStudio (currently working)

- Building a mobile-first retro pixel-art social media web application featuring an interactive pixel canvas editor and a community explore feed.
- Developing real-time direct messaging capabilities with collaborative drawing features to boost user interaction.
- Optimizing asset rendering and component structure to guarantee 60fps performance across diverse viewport sizes.

EDUCATION

Bachelor of Computer Applications (BCA) | Indira Gandhi National Open University (IGNOU)

Expected Graduation: 2026

- Relevant Coursework: Data Structures & Algorithms, Computer Architecture, Assembly Language, Object-Oriented Programming, Database Management Systems.
